

Patient Tracker // Surgical Options // Smart Coat™ Plus Technology

CTS

Companion Therapy System

The most advanced therapy laser is now available with surgical and advanced Patient Tracker™ options.

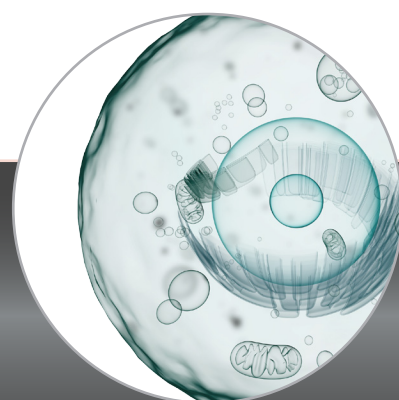

Designed for ease of use, consistent and reproducible outcomes, and client education, the CTS therapy laser can unleash the potential of any practice.

SmartCoat™ Plus Technology, Patient Tracker database software, application-specific treatment heads, and a surgical option for minor and endoscopic procedures make the CTS the most versatile therapy laser available.

The most advanced laser.

With the science and studies to support your medicine.

Unparalleled clinical support and a commitment to science make Companion the preferred laser therapy partner. Companion Therapy actively pursues on-going studies, offers lifetime support, and provides continuous education opportunities.

Easy, Reproducible Outcomes

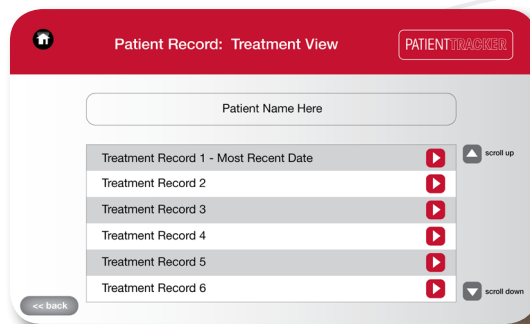

SmartCoat Plus technology, developed by LiteCure, is the Industry's only technology that defines and administers optimal treatment dosages based on the body type, hair length, and skin and coat color of the patient.

The image is a screenshot of the SmartCoat Plus software interface. It features a 'Select Patient Characteristics' section with four columns: 'Body Type', 'Coat Length', 'Coat Color', and 'Skin Color'. Each column has three options with corresponding checkboxes. The 'Body Type' column includes 'Thin', 'Average', and 'Overweight'. The 'Coat Length' column includes 'Short', 'Medium', and 'Long'. The 'Coat Color' column includes 'Light', 'Medium', and 'Dark'. The 'Skin Color' column includes 'Light', 'Medium', and 'Dark'. Below the selection area are 'Previous' and 'Next' buttons. On the left side of the interface, there is a 'Select Weight' section with a list of weight ranges and checkboxes: '0-20 lbs.', '20-40 lbs.', '40-60 lbs.', '60-80 lbs.', '80-100 lbs.', and '>100 lbs.'.

Patient Tracker Database Software

Easily track clinical outcomes and patient history with Patient Tracker, exclusively on the CTS therapy laser.

Track treatment details for every patient including treatment attachment used, anatomic area treated, specific treatment notes and much more. Repeat previous treatments with the click of a button, track pain scale scores and ensure the patient is receiving the perfect dose every time.

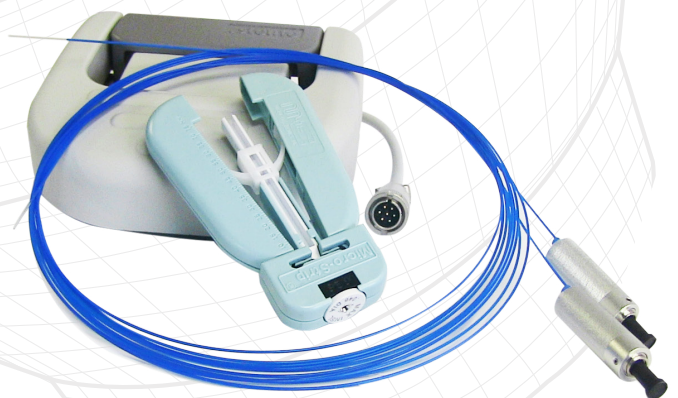

The right tools for every job.

Application-specific treatment heads make it easy to treat a variety of conditions. Contact and non-contact attachments give you the flexibility you need to treat everything from wounds to arthritis to chronic otitis allowing you to maximize your treatment options.

A Surgical Laser When You Need It

Surgical kits are available as an option and give your CTS an unrivaled level of versatility. The CTS can be easily used as a surgical laser for minor and endoscopic procedures. Add laser surgery and laser therapy components to your practice with the CTS.

About LiteCure

Combining physics, laser science, and engineering, LiteCure, LLC® is a leading medical device manufacturing company bringing advanced laser technology and innovative solutions to the health care industry.

Located in Newark, Delaware, LiteCure provides expertise in design, manufacturing, production and support. LiteCure provides highly reliable products, resources, and tools to successfully incorporate the technology and products into any practice.

LiteCure is an FDA-registered manufacturer providing FDA-cleared products for a variety of medical applications. Each product has been designed and manufactured under stringent quality control systems that are certified to meet ISO-9001 and ISO-13485 standards for medical devices.

With over 12 years of state-of-the-art laser development and manufacturing expertise, LiteCure ensures its customers the best in technology and design. LiteCure employs a highly experienced management team of research and development engineers that together represent over 100 years of experience in the field of laser development and systems integration.
